Git
MongoDB
Redux
C#
AWS
React Native
Angular

👤 SUMMARY

Mission - Offering a combination of technical projects, developing software solutions, and problem-solving skills for creating complex and scalable web applications. Proficient in using React, Redux, Typescript, Node JS and React Native. Pursuing a new role that will allow me to expand my skill set and expose me to new and exciting problem spaces to work on.

🌿 CORE COMPETENCIES

• Software Design • React Native Development • Problem-solving Skills • UX design • Full-Stack Development • Team-Leading Skills • Software Engineering • Organizational Skills • Cloud Automation • Frontend Development • Teamwork Abilities • Backend Development • Analytical Skills

📁 EMPLOYMENT HISTORY

Front End Developer at EarthCam Inc., Upper Saddle River, NJ

June 2022 — Present

- Designing, developing, and installing software solutions, including gathering user requirements, defining system functionality, and writing code in various languages.
- Engaged with multiple software engineers and dev ops teams on the creation and implementation rebuilding a legacy PHP multi-page CRM application into a single page application CRM by utilizing a modern technology stack that consisted using React, Redux, Typescript, Node.JS, React Native, MySQL.
- Migrated an existing user interface written in Angular 2 into reusable React components
- Built an internal tool for managing & creating user level access restrictions for controlling sensitive data.
- Contribute to and maintain knowledge base for other engineers' reference materials
- Slashed development build tool and improve system speed by 50% by using expert knowledge of industry best practice using Typescript and across technology stack.

🎓 EDUCATION

Bachelor of Science in Web Development and Design, Full Sail University

November 2019 — June 2022

Associates in Arts, Bergen Community College

September 2012 — June 2015

★ PROJECTS

Fitness Tracker

[GitHub](#) | [Demo](#)

Exercise app is a Full Stack Application that allows users view specific exercises and create workout plans

Tech Stack: HTML5 | CSS3 | JavaScript | NextJS | Material UI | | MySQL | NodeJS | Insomnia | DBDiagram | ExpressJS | Heroku | Vercel

Dashboard App

Front End application allows users to have a unique dashboard. This application is an entry level front-end focus application straying away from the traditional todo list while still focusing on created a CRUD application.

Tech Stack: HTML5 | CSS3 | JavaScript | NextJS | TailwindCSS | Heroku | Vercel
